PRESENTACIÓN

En este documento se presentan las cifras sobre movilidad de la población nacional y extranjera, desde y hacia Colombia durante el año 2003 y su comparación con los años previos. Este es el resultado de un esfuerzo adelantado por el Departamento Administrativo de Seguridad - DAS, con el apoyo técnico del Departamento Administrativo Nacional de Estadística – DANE y de la Organización Internacional para las Migraciones – OIM.

El anuario de movimientos internacionales da a conocer los resultados de un análisis general de los datos sobre entradas y salidas registradas en el país, con el fin de dar continuidad a la labor que inició el DAS a partir del año 1996 y como tal se inscribe en la serie de informes que sobre esta materia viene entregando anualmente el DAS para analizar y estimar la tendencia en el comportamiento de los movimientos de entradas y salidas internacionales, y asimismo, efectuar pronósticos de estos movimientos migratorios. En virtud de lo anterior y con el propósito de optimizar su labor, el DAS a partir del año 2003 empezó a modernizar el sistema de información migratorio en las diferentes secciones, con el ánimo de mejorar el servicio en todos los puntos de entrada y salida del país.

El documento presenta datos sobre la movilidad de las personas a través de las fronteras nacionales, captada por registro en los puntos de control, y por tal efecto no consideran los migrantes indocumentados que cruzan las fronteras. Las cifras dejan ver claramente algunos aspectos importantes sobre las tendencias en el comportamiento de la población colombiana y extranjera, su volumen y algunas de las características de las personas que en una o varias oportunidades salen y entran al país así como otros aspectos que, utilizando los datos que se consignan en el registro de entrada o salida, es posible establecer.

La información se recopila mediante las tarjetas de migración que contienen un conjunto de variables y sus correspondientes categorías, entre otras: código de identificación, fecha de nacimiento, fecha de entrada o salida, país de procedencia o destino, calidad migratoria de los extranjeros, punto de control, medio y compañía de transporte, edad y sexo. Estos datos son recolectados en los principales puntos de control migratorio. Se presenta la información global de los movimientos internacionales de extranjeros y colombianos.

I. INTRODUCCIÓN

La movilidad territorial de la población es uno de los aspectos relevantes que caracteriza a las poblaciones en las sociedades modernas. Hoy en día, el estudio de la movilidad territorial no se limita exclusivamente a conocer y analizar los movimientos al interior del país sino que cada vez resulta muy importante el conocimiento de la movilidad que trasciende las fronteras del país. El análisis de la evolución de los medios de transporte y más recientemente el estudio de la globalización de las economías es necesario para dimensionar las relaciones de interdependencia de estos procesos.

Estos datos como información estadística son de gran interés demográfico, pues pueden ser utilizados para establecer tendencias y estructuras de los movimientos internacionales. Con el análisis de la serie continua que aporta este sistema es posible conocer por lo menos parcialmente la situación del país en el campo de la movilidad internacional cuyos antecedentes, disponibles de los últimos años, muestran que la población colombiana presenta una fuerte tendencia a salir del país tanto temporal como definitivamente.

Cabe señalar en todo caso que - teniendo en cuenta las condiciones bajo las cuales se pueden realizar los movimientos internacionales - hace compleja la puesta en marcha de un sistema que capte estas problemáticas en forma amplia y generalizada. Específicamente la cuantificación y caracterización de este tipo de movimientos son difíciles debido a las características y condiciones particulares en que ocurren estos desplazamientos: Situaciones como la migración irregular que dificultan el registro de los movimientos internacionales; la doble nacionalidad que suelen tener hoy en día los ciudadanos y que podría llevar a ambigüedades respecto a su nacionalidad; la alta movilidad fronteriza con volúmenes apreciables de movimientos entre países, incluyendo los de tipo laboral que pueden tener una frecuencia muy alta. Asociado a la movilidad territorial, se debe considerar otro aspecto como es la cuantificación de la Migración Internacional, que resulta difícil determinar en el caso colombiano. Por esta razón, las cifras de entradas y salidas del país captadas, sistematizadas y procesadas por el DAS, constituyen una fuente para aproximarse a establecer los efectos netos de esos movimientos. Aunque estas cifras se refieren a datos de entrada y salida, fundamentalmente movimientos regulares, los saldos netos del período apuntan a señalar que los procesos de salida del país de la población Colombiana son crecientes y que con base en ellas se puede establecer las tendencias históricas y los efectos migratorios netos por año y sus acumulados a lo largo del tiempo.

Con estas cifras es posible establecer cambios en la composición por sexo, por edad, por destino, conocer la estacionalidad de los movimientos, saber cuáles son los medios de transporte, cómo pueden las personas estar cambiando los destinos, entre otras. De otro lado, el uso y costo de los medios de transporte asociado a la movilidad internacional de las personas, sea temporal o definitiva, significa sin duda mayores volúmenes de transacciones económicas, factor importante para medir el impacto que tienen las migraciones sobre la economía nacional.

II. RESULTADOS GENERALES

En este capítulo se analizan los resultados sobre las tendencias recientes de la movilidad internacional, desde y hacia Colombia, durante el período 1995 a 2003, en términos de los promedios mensuales de entradas y salidas. Las cifras corresponden a los datos de los registros que, para control de estos movimientos, tiene a su cargo el Departamento Administrativo de Seguridad DAS.

2.1 Dinámica de la movilidad internacional de la población en Colombia 1995-2003

Entre los años 1995 y 2001, el volumen mensual de movimientos internacionales brutos en Colombia pasó de 212.189 a 307.060 lo que significa un incremento del 44%, y un crecimiento medio anual del orden del 5 %. Para los dos últimos años 2002 y 2003, los datos muestran un cambio significativo que puede ser efecto de la estabilización de los flujos de personas que salen y entran al país.

Otro aspecto que se deriva de las cifras es que la composición de la movilidad internacional de los nativos y no nativos cambió drásticamente en dicho período. Mientras hacia 1995 el flujo era muy similar para colombianos y extranjeros, al finalizar el período los colombianos muestran una movilidad bruta dos veces más alta que la de los extranjeros pero evidenciado una menor movilidad internacional (Cuadro No. 1).

De los datos del cuadro se deduce que el incremento del flujo bruto de movimientos internacionales en el país, durante este período, se debió a un notable aumento de movilidad internacional de los colombianos. El volumen de la movilidad bruta de extranjeros, durante este período, se mantuvo prácticamente estable en cifras cercana a los 100 mil movimientos y representa tan solo la mitad del volumen de movimientos de los colombianos (Gráfico No.1).

Comparando los movimientos durante el período 1996-2003, en tres meses específicos: enero, mayo y septiembre, es enero el mes del año en que se registran los mayores volúmenes y que es creciente en el tiempo en tanto que en los otros dos meses es más estable y baja sensiblemente en el año 2002 respecto al 2001 y vuelve a subir ligeramente para el año 2003 (Gráfico No.2)

2.2 Movilidad internacional de población colombiana 1996-2003

La movilidad de los colombianos se refleja tanto en el incremento sostenido de los movimientos de salida del país como del volumen de movimientos de ingreso. Para el período 1996 - 2001, el volumen promedio mensual de salidas del país fue, en términos absolutos, superior al promedio mensual de registros de entradas. Bajo estas condiciones, si se utilizan estas diferencias como un síntoma de la tendencia de los colombianos a no regresar, se pone en evidencia que durante este período el país mantuvo un alto volumen de emigración. El año 2002 respecto al 2001, presenta un incremento de entradas y una reducción de salidas, lo cual sugiere una reducción del flujo de emigración, y posiblemente, una tendencia al retorno de las personas que salieron en años anteriores.

Visto de otra manera, puede señalarse que durante el período 1996 - 2001 del total de la población colombiana que salió del país en forma regular registrada por el DAS, un 80% regresó en algún momento. Esto significa que un 20% de los colombianos que salieron del país lo hicieron con intención de quedarse. No obstante, y de acuerdo con los datos del año 2002, se estaría cambiando la tendencia en la medida que al reducirse el volumen de salidas e incrementarse el retorno, la diferencia indica que tan solo se quedó un 10%, para el año 2003 no se incrementaron ni las entradas ni las salidas.

El gráfico No. 3 permite observar que el total de entradas y salidas de colombianos se mantuvo en aumento entre 1996 y el 2001, a partir de este momento se inicia una leve disminución de los movimiento internacionales particularmente en el número de salidas. De otra parte, el gráfico muestra que el total de salidas ha permanecido superior respecto a las entradas entre 1996 y el 2003.

Desde otra óptica, los saldos migratorios que arroja el balance de los movimientos internacionales fueron negativos y crecientes entre 1996 y el 2001. A partir del año 2002 la tendencia cambia, particularmente para los meses de mayo y septiembre.

2.3 Movilidad internacional de población extranjera 1996-2003

Colombia es en general un país poco atractivo para el arribo de población extranjera ya sea con fines de permanencia o de turismo. Es por ello que durante este período el volumen promedio mensual de entradas se ubica en cifras de alrededor 50 mil personas. En el caso de las salidas el promedio mensual es muy similar, aunque con valores menores, lo cual estaría significando una leve tendencia de personas extranjeras a quedarse en el país.

III. CARACTERIZACIÓN DE LOS MOVIMIENTOS INTERNACIONALES DE POBLACIÓN EN COLOMBIA 2003

3.1 Movimiento internacional global

El total de movimientos internacionales en los dos últimos años presentan algunos leves cambios. En el año 2003 se registraron en total 3.462.628 movimientos internacionales, un 2.1% menos que en el 2002 con 3.536.624. Con ello si bien el saldo sigue siendo negativo presentó un cambio importante al pasar de 119.790 en el 2002 a 90.915 en el 2003.

3.2 Total de movimientos internacionales de colombianos y extranjeros

La disminución de los movimientos internacionales en el año 2003 con respecto al 2002, se debió al menor número de salidas de colombianos. Durante el 2002 hubo un total de 1,277,210 salidas de colombianos, y durante el año 2003 tan solo se registraron un total de 1,177,220, lo que representa una reducción de 99,990 movimientos. En el caso de los extranjeros se redujo el flujo de entradas y como consecuencia las salidas y en todo caso con una aparente retorno de un poco más de 106 mil de los que llegaron en el año 2003.

Al relacionar el volumen de entrada de colombianos registradas en el año 2003 respecto a las del año 2002 se disminuyeron en 80.709 cual puede estar significando un menor retorno o el efecto de que se aumentaron las salidas. En el caso de los extranjeros se aumentaron en 58.148 entre el 2003 y el 2002.

3.3 Total de movimientos internacionales mensuales

Los datos del cuadro No. 6, evidencian que el país tiene dos períodos bien definidos para la movilidad internacional. En primer lugar, diciembre y enero concentra los mayores volúmenes, y en segunda instancia, el período junio a agosto. Los promedios para el año 2003 en el mes de enero el promedio es un poco mas bajo que para el año 2002, en junio baja con respecto al 2002, pero el julio y agosto se vuelve a aumentar en relación al 2002.

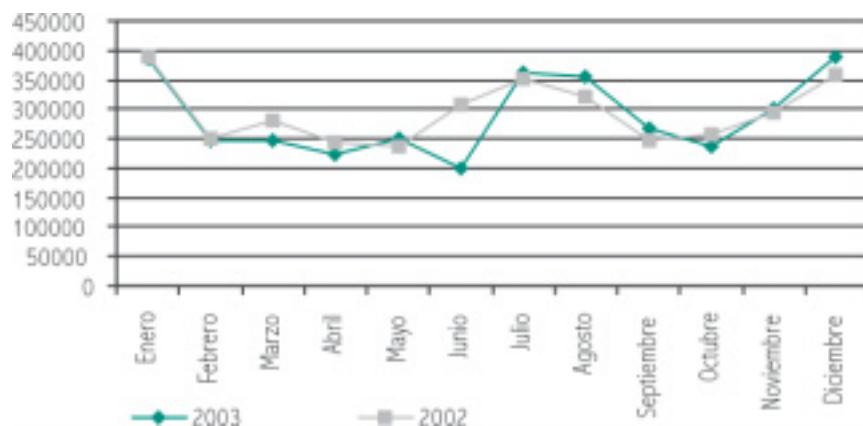

La tendencia de los movimientos internacionales para los dos años de referencia es similar. Los puntos más altos en ambos casos se presentan en los meses de Óbrero, julio y diciembre, y los más bajos en febrero, mayo y septiembre. De otra parte, el esquema permite observar que el nivel de la movilidad disminuye entre marzo y octubre durante el 2003, frente al mismo periodo del año anterior (Cuadro No. 6, gráfico No. 6).

3. 5 Puntos de control de la movilidad internacional

Las llegadas y salidas de extranjeros y colombianos se realiza por vía aérea y se concentra en un 64% en el aeropuerto de Bogotá, un 24% entre los aeropuertos de Cali, Medellín y Barranquilla y volúmenes menores por Cartagena y San Andrés.

Por vía terrestre el flujo ocurre fundamentalmente por las fronteras de Venezuela y Ecuador y en menor medida con Brasil. Lo más relevante en este aspecto es el aumento de la movilidad en la frontera con Venezuela en la cual en el año 2003 se aumento el flujo en un poco mas de 25.000 respecto al 2002. Así mismo con Ecuador aumento el flujo en 11.172.

3.6 Movimientos Internacionales por principales compañías aéreas

Si bien la compañía AVIANCA concentró la mayor parte del transporte con el exterior esta situación cambió entre el 2002 y el 2003, en la medida en que se redujo su participación de un 27.5% a un 10.2%, lo que en términos absolutos significa alrededor de 620 mil pasajeros menos.

Así mismo las aerolíneas American Airlines, Copa - Compañía Panameña de Aviación pasaron de transportar 542.180 pasajeros en el año 2002 a 270.041 en el año 2003. Esto le significó moverse, de una participación en servicios de transporte aéreo menor.

El transporte terrestre se mostró muy estable pues el menor movimiento con Venezuela fue compensado con mayor tráfico con Ecuador.

3.7 Movimientos internacionales según procedencia y destino

El principal destino de los movimientos internacionales desde Colombia durante el año 2003 (de colombianos y extranjeros), es América del Norte hacia donde en el año 2003 se generaron un poco más de 660 mil movimientos de colombianos lo cual representa un 38% del total de salidas de ese año; el segundo destino son países de América del Sur con 631 mil que significa un 36% y Europa con 169.190, que representan un 9%. La población extranjera sale del país en la misma dirección que lo hacen los Colombianos (Cuadro No.11).

Por países la información indica que el 39% de los viajes de colombianos se dirigieron hacia los Estados Unidos y un 13.13% hacia Panamá y 9.85% con Venezuela, países en los cuales es mayor la presencia de población colombiana.

Un punto que se puede destacar es que en todos los casos las entradas de Colombianos (movimientos de retorno) no superan los movimientos de salida lo que hace que se perciba una tendencia a irse, esto en la medida que las salidas son mayores que las entradas.

En el caso de los extranjeros los suramericanos son los que muestran un volumen mayor de entradas que de salidas. Esto seguramente tiene que ver con la crisis de Venezuela y el consecuente retorno de colombianos.

IV. DINÁMICA DE LA MOVILIDAD INTERNACIONAL DE POBLACIÓN COLOMBIANA Y EXTRANJERA 2003

4.1 Entradas internacionales de la población colombiana

Durante el año 2003 se registraron 1.060.947 movimientos de entrada de colombianos del exterior, 80.709 movimientos menos respecto al año inmediatamente anterior. El 41.8% de movimientos de estas entradas (443,621 en el año 2003), se originan en América del Norte, de los cuales 423,384 provenían de los Estados lo cual representa el 95% de los casos. De América del Sur ingresaron al país 267,843 viajeros esto es un 25.24% del total.

El mayor número de entradas de colombianos después de los que llegan de los Estados Unidos se origina en Panamá con 139,291; de América Central se registraron 210,416, un 19.83%, en su mayoría de Venezuela con 104,524; y de Europa 104,539, el 9.85%, continente en el cual España aporta el 70%.

La movilidad internacional de la población al igual que la interna es diferencial por sexo. Es así como los colombianos que llegan de los diferentes países hay predominio de la población masculina excepto en el caso de Europa. Del total de entradas a Colombia, 563,974 corresponde a hombres y 496,966 a mujeres, que corresponde a una masculinidad de 1.13 hombres, por cada cien mujeres, siendo Sur América la zona desde donde regresan más hombres que mujeres y Europa que por el contrario provee más retornos de mujeres que de hombres. (Cuadro No. 20 y gráfico 9).

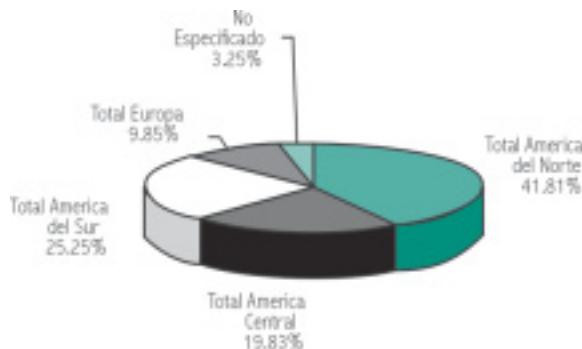

Por países en casos como Perú, y Ecuador las entradas de colombianos hombres duplican la de mujeres en tanto que las mujeres superan a los hombres en los casos de España y Aruba (Cuadro No.21).

4.2 Composición por edad de la movilidad internacional

La movilidad internacional al igual que la interna es diferencial según edad. En el total de la población colombiana que ingresó al país durante el año 2003, un poco más de 639 mil, que representa dos tercios de los movimientos de entrada en dicho año, correspondía a personas en edad de trabajar, con edades 20 a 49 años. Un 30% de estos (190 mil) vinieron desde los Estados Unidos.

4.3 Destino de los movimientos internacionales de los colombianos.

A lo largo del año 2003, se registraron en total 1,177,220 movimientos de colombianos hacia el exterior, 99 mil menos que en el año 2002 cuando se produjeron 1,277,210 salidas lo cual significa una reducción del 7,7%.

Cerca del 39 % de las salidas tuvieron como destino América del Norte y de ellos el 94 % su destino fueron los Estados Unidos. La menor movilidad hacia Norte América no fue compensada hacia sur América hacia donde se redujo el número de los viajeros en cerca de 41 mil, respecto al año 2002. Esto significo que Suramérica disminuyó su participación como destino de los Colombianos frente respecto al año 2002.

Europa en el año 2003, dejó de ser un destino para los Colombianos, presentando un reducción de mas de 9 mil movimientos, menos que los registrados en el año 2002.

Después de los Estados Unidos el país con mayor arribo de movimientos desde Colombia, se origina en Ecuador con 163,477 lo cual representa el 13,8 del total de entradas al país. Hacia América Central se produjo un decremento del flujo comparado con lo que ocurrió en el año 2002.

Al igual que las entradas, las salidas del país es diferencial por sexo. Es así como entre los colombianos que salen hay predominio de la población masculina excepto en el caso de Europa hacia donde se dirigen más mujeres que hombres y los Estados Unidos hacia donde la movilidad es muy equilibrada entre los dos sexos. Del total de salidas de Colombia, 630,038 fueron hombres y 547,173 mujeres, que corresponde a una masculinidad de 1.15 hombres, por cada cien mujeres, siendo Sur América la zona desde donde se desplazan más hombres que mujeres y Europa hacia donde se dirigen más mujeres que hombres (Cuadro No.26).

Panamá se convirtió en el tercer destino de los Colombianos con un fuerte componente masculina, al igual que en el caso de Venezuela.

Las cifras de salidas internacionales de la población colombiana del año 2003 frente al 2002 disminuyeron en 99.990, al pasar de 1.277.210 a 1,177,220. Mientras hacia los países Europeos también hubo una reducción de salidas de colombianos hacia todos los continentes.

Estos movimientos internacionales, que representan una caída del 48.6%,. De otra parte, aunque en menor proporción, las salidas de colombianos hacia Norte América se redujeron en el 4.9%, al pasar de 502.050 en el año 2002 a 454.733 en el año 2003.

Es factible que la disminución de salidas de colombianos hacia países como España y Estados Unidos, causadas potencialmente por medidas de control migratorio, se hayan traducido en el aumento de salidas a países de Suramérica y Centro América, como lo muestra el Cuadro No. 27.

4.4 Composición por edad de la población que sale del país.

La movilidad internacional al igual que la interna es diferencial según edad. En el total de la población colombiana que salió del país durante el año 2003, un poco más de 806 mil, que representa el 68% del total de movimientos de salida durante ese año, correspondía a personas en edad de trabajar, con edades 20 a 49 años.

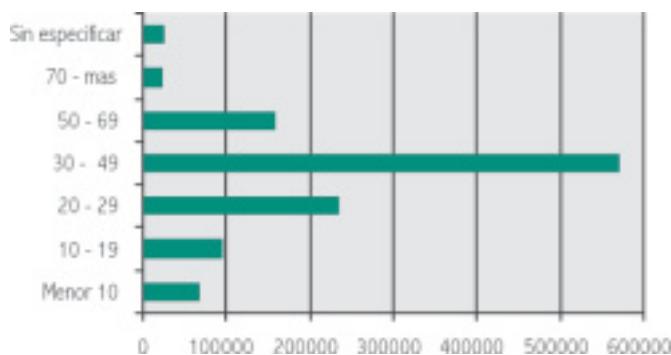

El cuadro No. 29, igualmente, permite apreciar la importante proporción de colombianos que salen del país entre los 20 y los 49 años, se dirigen prioritariamente hacia los Estados Unidos. De otro lado aunque Venezuela es el segundo lugar de destino para la población saliente, predomina Ecuador como país receptor en este grupo de edad, 3.2% sobre 2.2%.

V. CONCLUSIONES

- En el año 2003 se visualiza un aparente estancamiento en la movilidad internacional tanto de salida como de entrada lo cual se tradujo en un menor flujo global de personas.
- La menor movilidad se origina en una menor salida del país de los colombianos
- Reducción de la movilidad hacia Estados Unidos apareciendo como destino alterno, países de América Latina
- Estacionalidad de la movilidad concentrándose en las temporadas de diciembre - enero y junio a septiembre.
- Incremento de posición en la prestación de servicio de transporte de la compañía Avianca y pérdida importante de American Airlines, Aces, Copa Compañía Panameña de Aviación.
- Reducción importante de la movilidad entre Colombia y Venezuela, incrementando el flujo con Ecuador.
- La movilidad internacional en Colombia es selectiva en términos de sexo y edad. De una parte, la población que predomina tanto en los movimientos de entrada como de salida se encuentra en el grupo de edad de entre 20 y 49 años; y de otra, la población en su mayoría corresponde al sexo masculino.
